

**Number of Chronic Hospital Beds and Patient Days
and Percent Occupancy, by Facility: Maryland, 2005**

Jurisdiction/Facility	Number of Beds	Number of Days	Occupancy (%)
Baltimore City			
<i>James Lawrence Kernan Hospital</i> ¹	40	15,652	107.21%
<i>Johns Hopkins Bayview Medical Center</i> ²	69	21,963	94.88%
<i>Levindale Hebrew Geriatric Center and Hospital</i>	100	37,610	103.04%
<i>University Specialty Hospital</i>	180	47,613	72.47%
Prince George's County			
<i>Gladys Spellman Specialty Hospital and Nursing Center</i> ³	52	15,449	87.2%
SUBTOTAL: Private Chronic Hospitals	441	138,287	87.71%
Washington County			
<i>Western Maryland Hospital Center</i> ⁴	60	12,312	56.22%
Wicomico County			
<i>Deer's Head Hospital Center</i> ⁵	66	5,603	23.26%
SUBTOTAL: State-operated Chronic Hospitals ⁶	126	17,915	38.95%
STATEWIDE TOTAL ⁷	567	156,202	76.70%

Sources: Maryland Health Care Commission. The number of licensed chronic hospital beds maintained in the Commission's inventory is based on the Commission's Certificate of Need files and licensing information provided by the Office of Health Care Quality. The number of FY 2005 patient days for the private chronic hospitals is obtained from the Financial Data Base, as reported by private chronic hospitals to the Health Services Cost Review Commission (HSCRC), as of September 19, 2006. The number of FY 2005 patient days for the two state-operated chronic hospitals is obtained from the Hospital Management Information System (HMIS), as maintained by the Maryland Department of Health and Mental Hygiene.

Notes: The number of beds reflects the number of licensed chronic hospital beds at each facility as of June 30, 2005 (the end of the 2005 fiscal year reporting period). Occupancy is calculated based on licensed beds. For the two facilities with over 100 percent chronic hospital occupancy, patient days reflect that chronic hospital patients may be placed in other types of licensed beds within their facility.

¹ Kernan Hospital's 40 chronic hospital beds include 16 dually licensed chronic/rehabilitation beds.

² Johns Hopkins Bayview Medical Center added seven chronic hospital and two comprehensive inpatient rehabilitation beds, effective April 18, 2005. Bayview's 21,963 patient days is the combined number of patient days for the separately licensed 69 chronic hospital beds and six comprehensive inpatient rehabilitation (CIR) beds. Chronic hospital occupancy is calculated based on the 69 licensed chronic hospital beds.

³ Gladys Spellman expanded its chronic hospital bed capacity by 15 beds, with a concurrent reduction of 18 comprehensive care facility beds, phased in during August through December 2004 : + 6 beds (August), + 5 beds (September), + 2 beds (November), and + 2 beds (December).

⁴Western Maryland Hospital Center's occupancy, based on its 34 *budgeted* chronic hospital beds, would be 99.21 percent.

⁵ Deer's Head Center's chronic hospital occupancy, based on its 15 *budgeted* chronic hospital beds, would be 102.34 percent.

⁶ The occupancy for the two State-operated chronic hospitals, based on the total 49 *budgeted* chronic hospital beds, would be 100.17 percent.

⁷ The statewide chronic hospital occupancy based on the 441 *licensed* beds at the five *private* facilities plus the 49 *budgeted* beds at the two *state-operated* facilities would be 88.98 percent.
